

Meet2Doctor - Complete API Design (SP-based + SRP Compliant)

Authentication / Users

Method	Endpoint	Description	Stored Procedure
POST	/auth/register	Register a new user (generic, calls role-specific SPs)	sp_register_user
POST	/auth/login	Login and return JWT token	sp_login_user
GET	/auth/me	Get current logged-in user info (JWT protected)	sp_get_user_by_id
PUT	/auth/change-password	Change password	sp_change_password

Doctors

Method	Endpoint	Description	Stored Procedure
POST	/doctors/register	Register new doctor	sp_register_doctor
GET	/doctors	Get all doctors	sp_get_all_doctors
GET	/doctors/{doctor_id}	Get doctor by ID	sp_get_doctor_by_id
GET	/doctors/specialization/{specialization}	Get doctors by specialization	sp_get_doctors_by_specialization
PUT	/doctors/{doctor_id}	Update doctor details	sp_update_doctor
DELETE	/doctors/{doctor_id}	Delete a doctor	sp_delete_doctor
GET	/doctors/{doctor_id}/feedbacks	Get doctor feedbacks	sp_get_feedbacks_for_doctor
GET	/doctors/{doctor_id}/appointments	Get all appointments for doctor	sp_get_appointments_for_doctor

Patients

Method	Endpoint	Description	Stored Procedure
POST	/patients/register	Register a new patient	sp_register_patient
GET	/patients	Get all patients	sp_get_all_patients
GET	/patients/{patient_id}	Get patient by ID	sp_get_patient_by_id
PUT	/patients/{patient_id}	Update patient info	sp_update_patient
DELETE	/patients/{patient_id}	Delete a patient	sp_delete_patient
GET	/patients/{patient_id}/appointments	Get patient's appointment history	sp_get_appointments_for_patient
GET	/patients/{patient_id}/feedbacks	Get patient's feedbacks	sp_get_feedbacks_by_patient

Hospitals

Method	Endpoint	Description	Stored Procedure
POST	/hospitals	Add new hospital	sp_add_hospital

Method	Endpoint	Description	Stored Procedure
GET	/hospitals	Get all hospitals	sp_get_all_hospitals
GET	/hospitals/{hospital_id}	Get hospital by ID	sp_get_hospital_by_id
PUT	/hospitals/{hospital_id}	Update hospital details	sp_update_hospital
DELETE	/hospitals/{hospital_id}	Delete hospital	sp_delete_hospital
GET	/hospitals/{hospital_id}/doctors	List doctors in hospital	sp_get_doctors_by_hospital

Appointments

Method	Endpoint	Description	Stored Procedure
POST	/appointments	Create new appointment	sp_create_appointment
GET	/appointments	Get all appointments	sp_get_all_appointments
GET	/appointments/{appointment_id}	Get appointment by ID	sp_get_appointment_by_id
GET	/appointments/doctor/{doctor_id}	Get doctor's appointments	sp_get_appointments_for_doctor
GET	/appointments/patient/{patient_id}	Get patient's appointments	sp_get_appointments_for_patient
PUT	/appointments/{appointment_id}/status	Update status (Confirmed/Completed/Canceled)	sp_update_appointment_status
DELETE	/appointments/{appointment_id}	Cancel appointment	sp_delete_appointment

Feedback

Method	Endpoint	Description	Stored Procedure
POST	/feedbacks	Add feedback by patient	sp_add_feedback
GET	/feedbacks	Get all feedback	sp_get_all_feedback
GET	/feedbacks/doctor/{doctor_id}	Get feedback for a doctor	sp_get_feedbacks_for_doctor
GET	/feedbacks/patient/{patient_id}	Get feedback by patient	sp_get_feedbacks_by_patient
DELETE	/feedbacks/{feedback_id}	Delete feedback	sp_delete_feedback

Doctor-Hospital

Method	Endpoint	Description	Stored Procedure
POST	/doctorhospital	Assign doctor to hospital	sp_assign_doctor_to_hospital
GET	/doctorhospital	Get all doctor-hospital assignments	sp_get_all_doctorhospital
GET	/doctorhospital/doctor/{doctor_id}	Get hospital for a doctor	sp_get_hospital_by_doctor
GET	/doctorhospital/hospital/{hospital_id}	Get doctors in hospital	sp_get_doctors_by_hospital
DELETE	/doctorhospital/{id}	Remove doctor from hospital	sp_remove_doctor_from_hospital

Admin Activity Logs

Method	Endpoint	Description	Stored Procedure
POST	/admin/logs	Add new activity log	sp_add_admin_log
GET	/admin/logs	Get all logs	sp_get_all_admin_logs
GET	/admin/logs/{admin_id}	Get logs by admin	sp_get_logs_by_admin
